1. Introduction

This risk assessment document outlines potential risks associated with Plastic Expert Ltd's operations and activities while visiting and/or operating on 3rd party sites. The assessment aims to identify potential hazards and implement necessary controls to safeguard the health, safety, and well-being of our employees and the environment.

2. Fire Risks

2.1 Identification of Fire Hazards

Potential sources of ignition, such as electrical equipment or open flames.
Combustible materials present on the 3rd party site.

2.2 Fire Prevention Measures

Ensure that all electrical equipment is regularly inspected and maintained.
Prohibit smoking in designated areas only.
Implement proper housekeeping practices to minimize the accumulation of combustible materials.

2.3 Emergency Response

Establish clear emergency evacuation procedures.
Provide training to employees on the proper use of fire extinguishers and emergency response protocols.

3. Pollution Risks

3.1 Identification of Pollution Risks

Identify potential sources of pollution, such as chemical spills, waste mismanagement, and improper disposal practices.

3.2 Pollution Prevention Measures

Ensure proper containment and storage of hazardous materials.
Provide spill kits and appropriate training on their usage.
Implement waste management practices to prevent pollution.

3.3 Environmental Compliance

Ensure compliance with local environmental regulations and obtain necessary permits when operating on 3rd party sites.

4. Health and Safety

4.1 Identification of Health and Safety Hazards

Identify physical hazards, such as uneven surfaces, slippery floors, and overhead obstructions.

Identify potential risks associated with the handling of waste materials.

4.2 Health and Safety Controls

Conduct a thorough site inspection to identify and address potential hazards. Provide personal protective equipment (PPE) to employees based on the specific risks of each site.

Check for and follow clear signage to indicate hazards and safety procedures.

4.3 Training and Awareness

Provide comprehensive training to employees on health and safety procedures relevant to the 3rd party site.

Promote a safety culture through regular awareness campaigns and toolbox talks.

5. Chemical Spills

5.1 Identification of Chemical Spill Risks

Identify areas on the 3rd party site where chemical spills are more likely to occur. Determine the types of chemicals used on-site that may pose spill risks.

5.2 Chemical Spill Prevention Measures

Implement proper storage and handling procedures for chemicals. Establish containment measures and protocols to prevent and control spills.

5.3 Spill Response and Cleanup

Provide spill kits with appropriate absorbents and containment materials. Train employees in proper spill response and cleanup procedures.

6. Conclusion

The “Company Risk Assessment Document” for visiting and/or operating on 3rd party sites ensures that Plastic Expert Ltd proactively addresses potential risks and hazards. By implementing the necessary control measures and promoting a safety-conscious culture, we aim to protect our employees, the environment, and the communities in which we operate.
